## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 18-21 and 38-40, drawn to a mobile terminal having a first receiver and second receiver for receiving a signal conveying complementary information comprising schedule and configuration data, classified in class 455, subclass 130.
  - II. Claims 11-17 and 22-28 and 37, drawn to a mobile terminal having a transmitter for transmitting a signal conveying complementary information comprising schedule and configuration data, classified in class 455, subclass 91.
  - III. Claims 29-36, drawn to receiving a request for non-scheduled content to be included in a signal, classified in class 455, subclass 556.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as mentioned above, invention I drawn to receiver, invention II drawn to transmitter and the other one drawn to receiving a request for non-scheduled content.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2681

4. A telephone call was made to Fred Erick Bailey (42282) on 05/17/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
